DESIGNED FOR ENJOYMENT, NOT FOR WORK

At *Carysil* we recognise that the kitchen is the heart of every home; the place where food is prepared and friends and family gather. The place where both meals and memories are made. We design our kitchens with this in mind. Our kitchens are the perfect environment for storing, creating and sharing food.

Stylish, practical loveliness.

"Acrysil Group and the Carysil brand reflect a deep appreciation of technology, functionality and aesthetics."

Mr. Chirag Parekh
Chairman and Managing Director

ACRYSIL THE MOTHER BRAND

WHO WE ARE

Since being founded in the late 80s by *Mr Ashwin M Parekh*, *Acrysil* has earned a global reputation for its Composite Quartz Kitchen Sinks. Quartz, the hardest constituent of granite, constitutes around 80% of the raw material used in these sinks. The Quartz is moulded with High Grade Acrylic Resin using a special computer-controlled Polymerization Casting Process. The resultant hardened, composite material is resistant to scratches, dents, stains, heat and cracks.

Such has been the success of these *Carysil* quartz sinks, that *Acrysil* has had to ramp up capacity to meet the growing demand in over 40 countries worldwide including USA, UK, Germany, France, Canada, China, the Far East and Gulf Countries. *Acrysil* has also set-up a wholly owned subsidiary, *Acrysil GmbH* in Germany to further strengthen its presence in the discerning European markets.

THE MATERIAL

Carysil Granite is a high-quality, stone-like material made of appr. 80% quartz, the hardest component of granite, 20% acrylic and colour pigments.

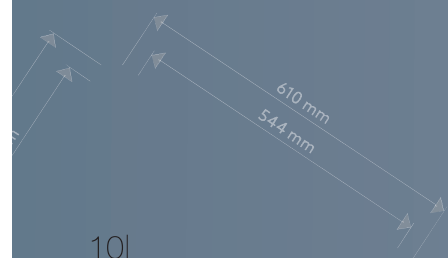

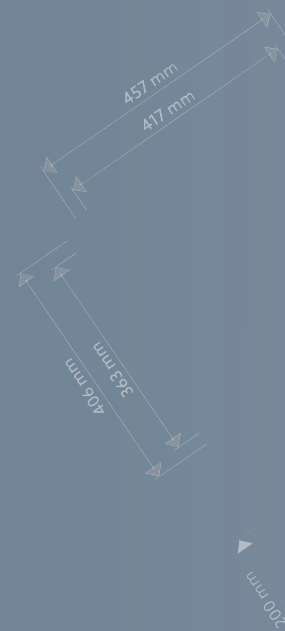

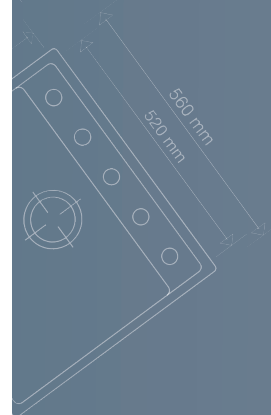

The non-porous surface and velvety feel of the material convey the impression of high quality instantaneously. This impression is not deceptive:

Carysil Granite Sinks are food safe and remain colourfast for years; they are easy to clean and extremely hard.
